## EDUCATION

Georgia Institute of Technology (GT) | 4.00/4.00  
B.S. Computer Science

Atlanta, GA  
May 2027

- **Minor in Computing and Business** — Denning Technology and Management Program
- **Concentrations:** Artificial Intelligence, Cybersecurity and Privacy
- **Relevant Coursework:** Linear Algebra, Object Oriented Programming, Data Structures and Algorithms

## PROGRAMMING SKILLS AND TOOLS

**Languages:** Proficient in **Java, Python, Swift, Javascript, HTML, CSS**; Familiar with **SQL, C++, C**

**Tools:** Proficient in **Git, GitHub, Figma, LaTeX, Power Automate, Agile Development, Microsoft Office**

## EXPERIENCE

**Software Engineer Intern**

May 2025 – Aug 2025

Parker Hannifin

Cleveland, OH

- Streamlined billion dollar **merger, acquisition, and divestiture** processes by **20%** for parker.com product owners by creating a backend automation leveraging GPT-4o to bridge business requirements and technical user stories
- Created a Distributor Results webpage in **Next.js** to allow Parker Customer Support to connect end-users with nearby distributor stores based on the selected Parker Division, location, and radius saving **5 hrs/week** of data entry time
- Integrated Parker Division database and Google Maps API to frontend for intuitive search and location mapping
- Contributed to Agile software development cycles by presenting in daily standup, sprint demos, and card movement

**Website Developer**

Aug 2023 – May 2024

The Beachcomber

Beachwood, OH

- Redesigned the website layout for Beachwood's student-run newspaper and frontend user experience using Bootstrap
- Boosted online engagement with news articles by **37%**, leading to increased community involvement and activism
- Performed regular site maintenance and updates adding new features such as Meet The Staff and Highlighted Stories

## PROGRAMMING PROJECTS

**Food Fairy** | *HackGT*

Sep 2025

- Led a team of non-technical members to build a Django food service web app that minimizes waste at Georgia Tech by a projected **30%** through safe and sustainable food sharing
- Used OpenAI's GPT-5 mini to recommend available foods based on user's previous claims using factors such as location

**Lofi Loop** | *GT Web Development*

Jan 2025 – May 2025

- Developed a public music platform that uses machine learning to generate personalized lo-fi beats for productivity and AI image generation for album covers
- Incorporated global chat and protected sign-on functionality capable of supporting **300+ simultaneous users**
- Designed UI using Figma and developed **full stack** code using MongoDB, Express.js, React.js, and Node.js

**Gloop Drop** | *Mobile Game*

Feb 2024

- Programmed a multi-level, **interactive game** using Swift and SpriteKit on Xcode, playable across multiple iOS devices
- Implemented a scoring system, animations, and touch-based physics interactions to enhance player experience

## LEADERSHIP AND COMMUNITY ENGAGEMENT

**Mentor** | *GT Global Leadership Living Learning Community*

Aug 2024 – Present

- Prototyped a water aeration device to target malaria in Nigeria aligned with the UN Sustainable Development Goals
- Presented the proposed device grant as a speaker at the **2025 Atlanta Global Studies Symposium**
- Engage in a mentorship program of 300+ members, fostering peer-to-peer connections and professional development

**Events Committee** | *GT Chinese Student Association*

Aug 2024 – Present

- Plan and lead monthly general body meetings for around 800 club members to celebrate and share Chinese culture
- Expanded club outreach to **200+ new students** as Freshman Representative through targeted social media campaigns

## ADDITIONAL SKILLS AND INTERESTS

**Languages** Mandarin (Chinese) – fluent, English – fluent

**Interests** Tennis, Soccer, Hiking, Music (violin and piano), Cooking, Sewing Clothes, Forestry, Girls Who Code
